

**MEDIA ADVISORY
FOR IMMEDIATE RELEASE
25 July 2025**

**POWER INTERRUPTION AT POLOKWANE INTERNATIONAL AIRPORT ON
LANDSIDE – OPERATIONS CONTINUE AS NORMAL**

Polokwane International Airport wishes to inform the public of a temporary power outage affecting the landside area. The outage has impacted terminal lighting and certain electrical plugs.

We would like to assure passengers and stakeholders that Airlink operations remain unaffected, as they are powered by a backup generator. In addition, the airside of the airport is fully operational and well-lit through alternate power sources.

All flight operations are continuing as normal, and safety and security remain our top priorities.

Technicians are on site to restore full power to the landside and terminal as quickly as possible. We thank our passengers and partners for their patience and understanding during this time.

For updates, please follow our official communication channels.
