 AND ONSITE SUPPORT (NEXT BUSINESS DAY) AT POLOKWANE
 INTERNATIONAL AIRPORT**

NO.	QUESTIONS	GAAL RESPONSES
1.	Please specify the total load (power draw) of all devices to be protected by the UPS, so we can offer the correct amount of battery and further be able to estimate the run time that the UPS will have during the total power outage.	As stated per the specification requirement, 10KVA/10KW UPS is required. We don't have an exact power output however, the supplier must provide a battery bank big enough to cover the output amps of 10KW UPS.
2.	Kindly confirm the submission format, it is a 2-envelope system? Are the copies required?	The submission must be in one package, as per exhibit instruction. Clearly marked the bid description an reference number. There is no need for additional copies.
